

**Project Title: Life management platform using social big-data for elderly home assistance**

**Proponent Group: NEC Solution Innovators, Ltd.; Kanazawa Water and Energy Center;  
Kanazawa University; NEC Corporation;**

## SUMMARY

The purpose of this study is to develop the life management platform. This platform uses the remote sensing technologies and the analyzing technologies. The remote sensing technologies are a method of collecting behaviors of elderly and home environments by monitoring public utilities and using the variety of sensors. The analyzing technologies are a method of predicting assist information by collecting data.
